

Cat Ppalu

Nassau, Bahamas

\$1575 pp double

October 27th-Nov 2nd, 2018

We welcome divers as well as snorkelers to sail with us from Nassau, Bahamas thru the Exuma Islands aboard the Cat Ppalu. The Exumas are a group of over 360 islands and cays southeast of Nassau that were settled in the 1780's by loyalist fleeing the Revolutionary War. Some of the Exumas are protected by the Exuma National Land and Sea Park, many of these areas are unnamed but offer beautiful beaches that you can explore.

With no set itineraries on the Cat Ppalu you will be able to sit back and relax, soak up some rays, enjoy the warm ocean breezes, dive to your hearts content all while enjoying scrumptious meals and yummy snacks. Most of our underwater adventures are easy dives with lots of marine life, beautiful corals and opportunities to explore all the nooks and crannies of the wrecks and reefs. For the more adventurous divers, you can flip somersaults and roll about in the washing machine, glide with a current on a drift dive, explore the depth of the Blue Hole and even dive and observe the sharks while they feed. In the evening enjoy a twilight dive or kick back with your friends to share stories of your best diving adventures. Along with the many diving opportunities you will also have a variety of other activities like hoisting the sails, snorkeling, lobster hunting, deep sea fishing, kayaking and island exploring.

Don't miss your opportunity, stop in to sign up for this week long diving adventure. Continue your adventure by adding a few extra days to explore Nassau and play at Atlantis Water Park.
